Part 1: Reading information from a script

In this exercise you will use the "obl Sports.ddl" file to consolidate your knowledge of DDL.

Open the "obl Sports.ddl" in a text editor.

1. How many tables have been created using the CREATE TABLE statement?

10 tables

2. How many columns are created for the price history table?

6 columns

3. What statement is used to enforce the constraint that the category column of the items table must have a value?

NOT NULL

4. What is the name of the foreign key constraint between the customers and customer addresses tables?

customer_address_fk

5. What are the lowest and highest values that can be stored in the commission_rate column for the sales representatives table?

Lowest value: -99 , Highest value: 99

6. What are the lowest and highest values that can be stored in the price column for the price_history table?

Lowest value: -99999.99 , Highest value: 99999.99

7. What are the 3 columns that make up the primary key for the price_history table?

itm_number, start_date, start_time

Part 2: Updating Constraints

Log-in to APEX and go to the SQL commands environment

Modifying a column

1. Run the DESCRIBE command on the orders table to view its structure.

1 DESCRIBE ORDERS

Object Type TABLE ? Object ORDERS ?									
Table	Column	Data Type	Length	Precision	Scale	Primary Key	Nullable	Default	Comment

	NUMBER_OF_UNITS	NUMBER	-	2	0	-	-	-	-
	CTR_NUMBER	VARCHAR2	6	-	-	-	-	-	-

2. Task: Add a default constraint that will use today's date to assign a value to the odr_date column of the orders table if no date is provided.

1 ALTER TABLE ORDERS				
2 MODIFY odr_date DATE DEFAULT SYSDATE

Adding a column

The client has decided that they would like a separate column for the customer's mobile phone number. This is an optional column that will be required to store 11 digits.

1. Run the DESCRIBE command on the customers table to view its structure.

1 DESCRIBE CUSTOMERS									
Results Explain Describe Saved SQL History									
Object Type		TABLE ?		Object		CUSTOMERS ?			
Table	Column	Data Type	Length	Precision	Scale	Primary Key	Nullable	Default	Comment

2. Task: Add column that will satisfy the clients requirements

```
1 ALTER TABLE CUSTOMERS
2 ADD mobile_no VARCHAR(11)
```

3. Run the DESCRIBE command on the customers table to view its structure.

Dropping a column

The client has decided that they don't need the mobile number column as most customers only provide a single contact number and that is already catered for with the existing phone_number column.

1. Run the DESCRIBE command on the customers table to view its structure.

1 DESCRIBE CUSTOMERS
